PROFESSIONAL SUMMARY

AI & Data Science engineering student with hands-on experience in web development and cloud technologies. Skilled in HTML, CSS, JavaScript, Python, and Firebase, with experience developing web-based projects such as College ERP and LinkGrid. Strong interest in building practical, user-focused solutions, with additional experience in social media management and volunteering.

EDUCATION

B.E. - Artificial Intelligence and Data Science Sept 2024 - Present

Terna Engineering College, Nerul · GPA: 7.2

WORK EXPERIENCE

Web Operations Intern July 2026 - Sept 2026

Concept Simplified — Remote

SKILLS

Programming Languages: Python, SQL

Web Development: HTML, CSS, JavaScript

Databases & Cloud: Cloud Firestore, Firebase Auth

Tools & Workflows: GitHub, REST APIs, Canvas API

PROJECTS

EduNexus ERP | HTML + CSS + Vanilla JavaScript, Cloud Firestore, Firebase Authentication

College ERP is a web-based college management system that helps manage students, faculty, attendance, exams, grades, timetable, assignments, and fees. It provides separate dashboards for Admin, Faculty, and Students and uses HTML, CSS, JavaScript, and Firebase.

GitHub

LinkGrid | HTML + CSS + Javascript

LinkGrid is a web-based tool that shortens long URLs and converts links into QR codes. It makes links easier to share and access while providing a simple and user-friendly interface.

GitHub

Polaris | HTML, CSS, JavaScript, REST APIs

An integrated polar expedition management platform that streamlines expedition planning, asset and inventory management, logistics, risk monitoring, and AI-assisted operational decision-making.

GitHub

PROJECTS

Belt Guard AI | JavaScript, HTML, CSS, Vite, Recharts

An AI-powered industrial monitoring dashboard that uses simulated multi-sensor telemetry, sensor-fusion risk scoring, and anomaly detection to monitor conveyor belt health, identify potential faults, and support predictive maintenance. Won the internal hackathon as main shortlisted idea for SIH 2026.

GitHub

ACHIEVEMENTS & HACKATHONS

Internal Winner & National Shortlist — Smart India Hackathon (SIH 2026) 2026

Ministry of Education · Team Innovexa

Won the college internal hackathon with **Belt Guard AI** as the primary shortlisted idea for national stage nomination. Subsequently selected and engineered **POLARIS** as the 2nd problem statement platform for expedition logistics and risk monitoring.

Finalist — Hackcelestial 3.0 Sept 2026

Pillai University · Tech Alegria 2026 (24-Hour Hackathon)

Selected as a finalist out of competing engineering teams in an intensive 24-hour national offline hackathon organized by Pillai University and CSI PCE at Dr. K. M. Vasudevan Pillai Campus, New Panvel.

VOLUNTEER EXPERIENCE

Social Media Head Jan 2026 - March 2026

Avalon Terna Techfest 2026

Volunteer Sept 2025 - Present

NSS
